

GOOD FOOD COMES FROM **GOOD SEED.**

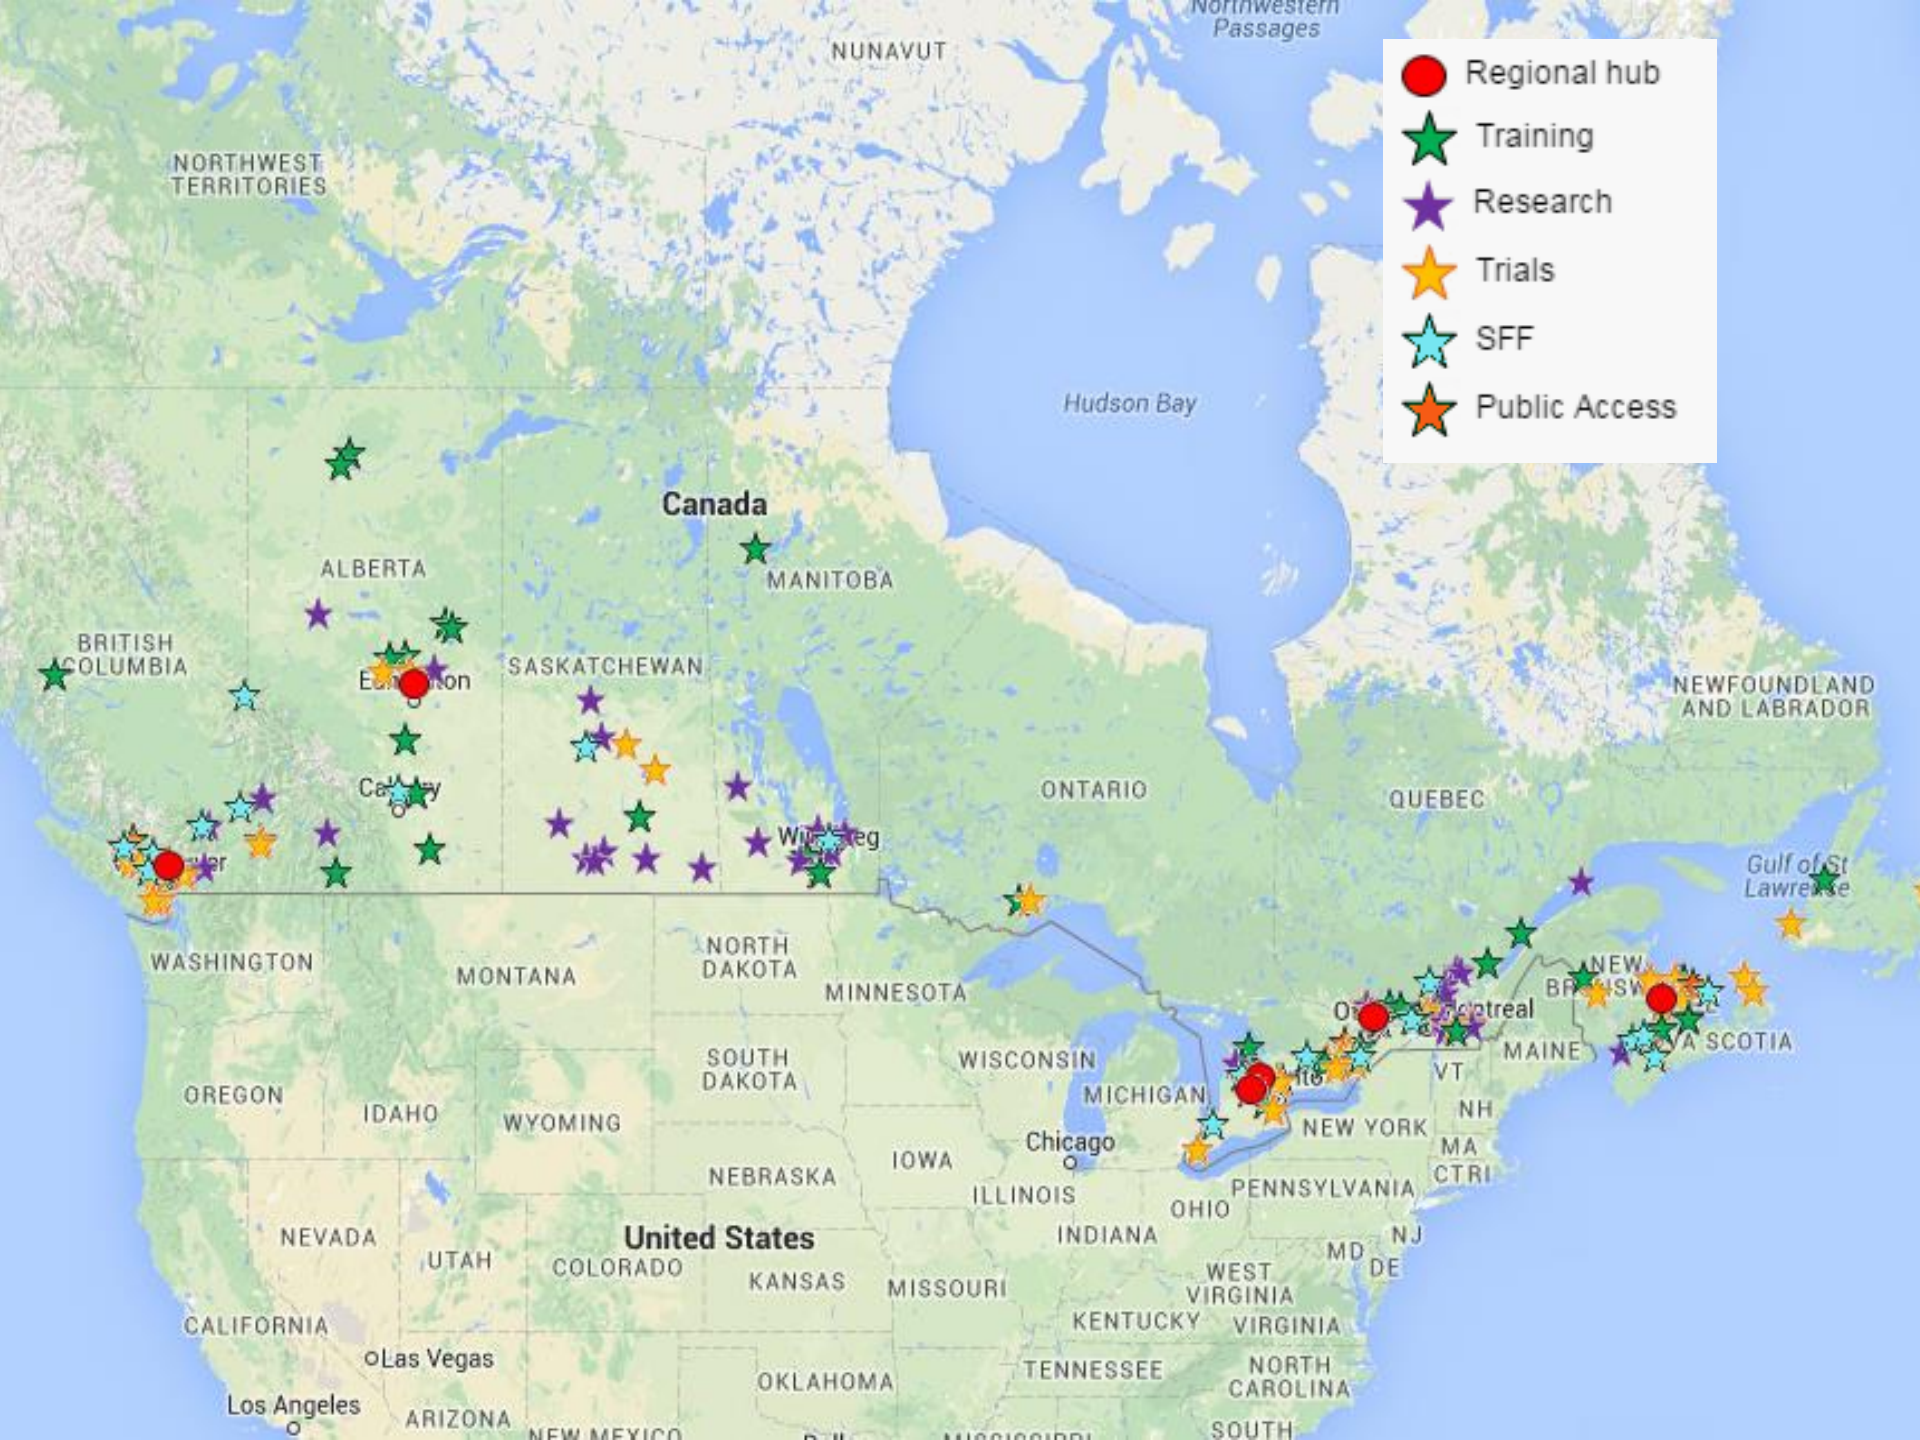

USC CANADA
HOW WE GROW OUR FOOD MATTERS

THE BAUTA FAMILY INITIATIVE ON
CANADIAN SEED SECURITY

PROVIDED THAT...

- The seed is grown on a well-managed ecological farm, and ...
- That the farm has good rogueing, selection, harvesting, cleaning, germination, and seed quality standards, and...
- That the farm can effectively manage weeds, pests, disease, and...
- That the farm has access to skilled labour to manage their operations, and...
- That the farm has the capacity to provide fair wages to their labour and themselves, and...
- That those seeds are non-proprietary and in the public domain, and...
- That there is public support for seed conservation and development, and...
- That the food grown from these seeds are accessible to the public in just and equitable ways, and...
- That this is all done on land that can be maintained as farmland in perpetuity, and...

THANK YOU!
